## EDUCATION

### Vinnytsia Physics and Mathematics Lyceum №17

*September 2022 – May 2025*

Graduated with honors, focusing on physics, mathematics, and computer science.

Successfully participated in summer school and physics-math competitions.

### Igor Sikorsky Kyiv Polytechnic Institute

Faculty of FIOT, Major F2

*First-year student (2025–2026 – present)*

During the past semester in the F2 specialty at the university, I have studied the basics of programming, algorithmization, mathematical analysis, linear algebra, analytical geometry, and several other subjects. I successfully completed my first exam period and am continuing my studies. This semester, I will focus on the fundamentals of computer systems and networks, as well as software engineering components and modular programming. This experience has provided me with a solid foundation for more advanced courses in the future.

## About Me

I am a goal-oriented, adaptable, and curious student who is always eager to learn new things and develop in different areas. I have a wide range of skills – from programming and working with computer technologies to baking desserts and creating creative content.

I adapt easily to new environments, learn quickly, and can work effectively both independently and in a team. My flexibility and versatility allow me to successfully combine academic, professional, and creative projects.

## EDUCATION AND STEM ACTIVITIES

### Vinnytsia Physics and Mathematics Lyceum №17

*2022–2025*

- Actively participated in Physics and Mathematics Battles; served twice as team captain, presenting solutions to applied physics problems.
- Attended a summer school focused on computer science, mathematics, and physics.
- Participated in the MAN Ukraine 2021–2022 competition in the “Internet Technologies and Web Design” section with the project “Mobile Calculator with Voice Assistant” — 3rd place at the regional stage.
- Studied programming: Python, C#, C++, applying skills in school projects and assignments.
- Created a “Tic Tac Toe” game in Python as a graduation project.
- Developed a functional calculator with a graphical interface in C# (Windows Forms).
- Organized and led beadwork workshops for displaced children, teaching basic skills while fostering creativity and improving my teaching and communication abilities.

### Igor Sikorsky Kyiv Polytechnic Institute

*2025–2026*

- Participating in the TANDEM-UA-DE Project – English for Academic Purposes course (Winter semester)

## PROGRAMMING LANGUAGES

- C
- C++
- C#
- Python
- HTML
- CSS
- Java Script

## LANGUAGES & PROFICIENCY

Ukrainian – native  
Russian – native  
English – B2  
Finnish – B1
